

## ADVANCED PROGRAMMING PRACTICE (21CSC203P)

Unit – 2 : Session – 2 : SLO – 2 | Static Variables

Name: ANUSHKA JAIN ANUSHKA JAIN | Reg. No: RA2511003011974 | Solved Worksheet

---

### Activity (Solution)

- Output: Count is: 1 / Count is: 2 / Count is: 3
- Justification: count is STATIC, so a single copy is shared by all Counter objects. c1.increment() raises the shared count to 1; c2.increment() raises the SAME variable to 2; c1.increment() raises it to 3. If count were an instance variable, each object would have its own copy and the output would be 1, 1, 2.
